## SUMMARY

Cybersecurity Analytics and Operations student and Programmer with DevSecOps experience in software implementation, Linux, automation, container security, CI/CD, and test automation.

## EXPERIENCE

### Programmer - Lockheed Martin | Aug 2024 - Present

- Support software implementation, DevSecOps workflows, automation, and collaborative development.
- Work with Linux, Bash, Shell, YAML, Git, GitLab, Docker, GitOps, and CI/CD practices.
- Perform container scanning with Trivy and work with Nexus artifact/repository workflows.
- Support test automation with TestComplete; collaborate using Jira, Confluence, Agile, and Scrum.

### Sales Associate - Mind Games | Oct 2019 - Mar 2022

- Supported customer satisfaction, retail sales, product recommendations, and team operations.

## EDUCATION

### Penn State World Campus

B.S. Cybersecurity Analytics and Operations | Fall 2025 - Present

### Montgomery County Community College

Associate of Science (A.S.), Computer Science | 2019 - Dec 2022 | GPA: 3.2

## TECHNICAL SKILLS

DevSecOps: CI/CD, GitOps, Docker, Trivy, Git, GitLab, Nexus

Development: Python, JavaScript, HTML, Object-Oriented Programming, Bash, Shell, YAML

Testing/Tools: TestComplete, Jira, Confluence, Visual Studio Code, Oracle SQL Developer

Data: pandas, NumPy, scikit-learn, Jupyter Notebook

## SELECTED PROJECT

### Steam Game Recommendation Engine

Team-built Python recommendation system using pandas, scikit-learn TF-IDF similarity, PySimpleGUI, and Jupyter-based Steam/SteamSpy data preparation. Returns recommendations with price and ratings.
